

Account Code

The Account Code Module is a centralized platform designed to manage and organize account codes. It provides a comprehensive overview of account code information, allowing users to efficiently create, search, and update account codes.

Account Code Search: Allows users to search for existing account codes based on various criteria, such as code, side, and status.

Account Code Table: Displays a list of created account codes, providing details such as

- ID
- Code
- Name
- Create Staff
- Side
- Type/Group
- Status
- Date Created
- Comment
- Actions
