

# Car Dealer Shop

The **Car Dealer Shop** module is a dedicated management tool for registering and maintaining a database of external automotive partners. This module allows for the detailed tracking of shop locations, financial details, and specific contact personnel.

---

## 1. Adding a New Car Dealer Shop

To register a new partner, users must navigate to the **Add New** section under the Car Dealer Shop menu. The registration form is divided into shop identity and financial information:

- **Shop Identity:** Record the official **Shop Name, Shop Address, Shop Phone No,** and **Shop Email.**
  - **Financial Details:** To ensure seamless transactions, provide the **Bank Name, Branch, Bank Account No,** and **Bank Account Name** associated with the shop.
- 

## 2. Contact Person Management

This section provides a flexible way to manage the individuals working at each shop.

- By clicking the **Add Contact Person** button, the system generates new fields for individual staff members.
  - **Contact Details:** For every person added, users can input their **First Name, Last Name, Phone No,** and **Designation.**
  - You can add any number of contact persons or remove them as needed using the **Remove** button next to each entry.
- 

## Key Actions

- **Save Changes:** Finalizes the registration and saves all shop and contact person data to the system.
  - **Cancel:** Discards the current form and returns the user to the dashboard.
  - **List All:** Accessible from the sidebar menu to view and manage the full directory of registered shops.
-
